MEDICAL REPORT.

THE annual period which is referred to in the Medical Report required to be laid before the present General Meeting of Managers of the Aberdeen Lunatic Asylum, embracing a term which had elapsed previous to the Reporter's entry on the office of Medical Superintendent, it has been thought best to confine the review of the operations of the Institution to such numerical statements as suffice to exhibit its statistical history during that time. These are afforded in a series of Tables compiled, in a great measure, from the materials left behind by Dr. Campbell, the previous Superintendent, and will be found to give a full and very favourable representation of the efficiency of the Hospital under his management.

At the commencement of the year there were two hundred and fifty patients remaining in the Hospital, of the curability of a great proportion of whose cases an unfavourable estimate was formed ; during the succeeding twelve months ninety-five other cases were added, of a very miscellaneous character, making a gross number of three hundred and forty-five patients, of whom, at the termination of the year, two hundred and seventy-one still continued under the guardianship and treatment of the Institution. Eighteen of the seventy-four removals are attributable to death. Of the remaining fifty-six all but two may be said to have been benefited, forty-two qualified for full emancipation, and twelve so far improved as to allow removal by their friends.

During the progress of the year the number of patients resident in the House kept steadily increasing—the smallest number being at the commencement, and the highest at the termination of the time specified. The mean number resident was two hundred and sixty-three.

The Tables appended are, in most particulars, similar to those in former Reports, and uphold conclusions consistent with prevalent scientific doctrines on the characteristics of the disease. They exhibit the medical results not only of the past but of the thirty-one preceding years; a classification of the admissions in reference to the districts from which the cases have been sent; the ages, sex, social condition, and occupation of the patients; the forms and complications, and the mental, physical, exciting, and predisposing causes, and previous duration of the disease; a view of the more important features in the recovered cases; a detailed obituary; a classification of the cases remaining in the House; and an appended list of articles of clothing which have been made by its inmates during the past year. The proportion of cures is above that of the former year, and much about the average in such Institutions in this country, while the mortality is somewhat less. Amongst the peculiarities are noticeable a less curability, in the female cases, a greater relative amount of married patients in the Table of social conditions, an entire absence of cases of Dementia in the list of recoveries, and a greater than ordinary proportion of cures amongst older cases. The Reporter has to bear testimony to the excellent working order in which he found all departments of the Hospital on taking charge; and, in conclusion, begs to return his thanks to the Visiting Managers for their support and encouragement, and to the Consulting Physician, for his cordial co-operation, as also to acknowledge the efficient assistance afforded him by the resident and non-resident officials generally, in the discharge of his duties.

ROBERT JAMIESON, M.D.

TABLES.

NOTE.—In order that the Statistical and Financial Years of the Institution should accord, the Tables in the present Report embrace a period of only Eleven Months, being made up to the 31st March, instead of, as formerly, to the 30th April.

TABLE I.

GENERAL RESULTS OF THE YEAR.

	Males.	Females.	Total.
Patients in the Asylum, 1st May, 1852,	- 123	- 127	- 250
Admitted during the year (eleven months),	- 51	- 44	- 95
Under treatment during the year,	- 174	- 171	- 345
Removed during the year :—			
Recovered, - 22	- 20	- 42	
Improved, - 8	- 4	- 12	
Unimproved, - 2	- 0	- 2	
Dead, - 10	- 8	- 18	- 42
Remaining in the Asylum, 31st March, 1853,	132	139	271

TABLE II.

CLASSIFICATION OF ADMISSIONS RELATIVE TO PLACES OF RESIDENCE.

	Males.	Females.	Total.
From Aberdeen and Suburbs,	- 27	- 24	- 51
From other parts of Aberdeenshire,	- 12	- 14	- 26
From more distant localities,	- 12	- 6	- 18
	51	44	95

TABLE III.

SOCIAL CONDITION OF PATIENTS ADMITTED.

	Males.	Females.	Total.
Single,	- 23	- 24	- 47
Married,	- 27	- 13	- 40
Widowed,	- 1	- 7	- 8
	51	44	95

TABLE IV.

AGES OF PATIENTS ADMITTED.

							Males.	Females.	Total.
From 10 to 20,	-	-	-	-	-	-	5	0	5
.. 20 to 30,	-	-	-	-	-	-	10	14	24
.. 30 to 40,	-	-	-	-	-	-	13	10	23
.. 40 to 50,	-	-	-	-	-	-	8	14	22
.. 50 to 60,	-	-	-	-	-	-	13	4	17
.. 60 to 70,	-	-	-	-	-	-	2	2	4
							—	—	—
							51	44	95

TABLE V.

OCCUPATIONS OR STATION IN LIFE OF PATIENTS ADMITTED.

Epilepsy, with Amentia,	1	0	1
Epilepsy, with Mania,	1	0	1
Paralysis, with Melancholia,	0	1	1
Chorea, with Mania,	1	0	1
Hysteria, with Monomania,	0	1	1
Hypochondriasis, with Monomania,	1	0	1

TABLE VIII.

COMPLICATIONS OF CASES ADMITTED WITH DISEASED IMPULSE.

	Males.	Females.	Total.
Suicidal Impulse, with Mania,	3	2	5
Do. with Monomania,	1	2	3
Do. with Melancholia,	7	11	18
Homicidal Impulse, with Mania,	1	0	1

TABLE IX.

CLASSIFICATION OF CAUSES ASSIGNED IN CASES ADMITTED.

Mental cause assigned in	-	-	10·52 per cent.
Physical cause assigned in	-	-	50·52 ..
Mental and Physical causes assigned in	-	16·84 ..	
Predisposing cause assigned in	-	26·31 ..	
Exciting cause assigned in	-	32·62 ..	
Predisposing and Exciting causes assigned in	-	20·00 ..	
No cause assignable in	-	21·07 ..	
Hereditary predisposition assigned in	-	27·37 ..	
Previous attack assigned in	-	16·84 ..	

TABLE X.

CASES ADMITTED SUPPOSED ATTRIBUTABLE TO MENTAL CAUSES.

No.	CAUSE.	Sex.	Age.	CASE.
1	Vexed fraternal affection,	-	F. 55	Mania.
2	Vexed maternal affection,	-	F. 44	Melancholia.
3	Grief for death of a brother,	-	F. 23	Melancholia (suicidal).
4	Sympathetic grief,	-	F. 22	{ Melancholia (tending to Dementia).
5	Disappointment in love,	-	F. 24	Monomania (<i>elata</i>).
6	Disappointed pecuniary ex- pectations,	{	F. 49	{ Melancholia (terminating in paralytic Dementia)
7	Pecuniary embarrassment,	-	F. 40	Melancholia.
8	Ill-regulated devotional feeling,	F.	23	Mania (suicidal).
9	Fright,	-	M. 54	Dementia.
10	A quarrel,	-	M. 60	Mania.

TABLE XI.

CASES ADMITTED SUPPOSED ATTRIBUTABLE TO PHYSICAL
EXCITING CAUSE.

No.	CAUSE.	Sex.	Age.	CASE.
1	Fever,	-	M. 14	Mania, tending to Dementia.
2	Do.	-	M. 58	Monomania (hypochondriacal).
3	Do.	-	F. 50	Mania.
4	Do.	-	F. 20	Melancholia.
5	Convulsions,	-	M. 30	Amentia (epileptic).
6	Injury of Head,	-	M. 25	Monomania (<i>elata</i>).
7	Do.	-	M. 28	Monomania.
8	Childbirth,	-	F. 32	Monomania (<i>depressa</i>).
9	Over-nursing,	-	F. 29	Mania.
10	Disordered Uterine Function,	F.	40	Mania (suicidal).
11	Do. do.	-	F. 23	Melancholia.
12	Spermatorrhea,	-	M. 21	Dementia.
13	Intemperance,	-	M. 29	Mania.
14	Do.	-	M. 51	Mania.
15	Do.	-	M. 54	Mania.
16	Do.	-	M. 46	Mania (homicidal).
17	Do.	-	M. 40	Mania (epileptic).
18	Do.	-	M. 26	Monomania.
19	Do.	-	M. 47	Monomania (<i>depressa</i>).
20	Do.	-	M. 36	Melancholia (suicidal).
21	Do.	-	F. 26	Mania.
22	Do.	-	F. 35	Mania.

TABLE XII.

COMBINED PHYSICAL AND MENTAL CAUSES OF CASES ADMITTED.

No.	MENTAL CAUSE.	PHYSICAL CAUSE.	Sex.	Age.	CASE.
1	Domestic anxiety,	Hered. tendency,	M.	60	Monomania.
2	Do.	Do.	F.	38	Melancholia.
3	Grief,	Do.	F.	49	Mania.
4	Do.	Previous attack, -	F.	46	Mania.
5	Vexed maternal affection,	Hered. tendency,	F.	51	Melancholia.
6	Remorse,	Dyspepsia, -	M.	40	Monomania (suicidal.)
7	A quarrel,	Hered. tendency,	M.	60	Monomania.
8	Destitution,	Do.	F.	41	Mania.
9	Do.	Do.	F.	50	Melancholia (suicidal).
10	Do.	Intemperance, -	M.	35	Mania.
11	Do.	Do.	M.	45	Dementia.
12	Do.	Do.	F.	23	Mania.

TABLE XIII.

CLASSIFICATION OF ADMISSIONS IN RELATION TO HISTORY, AND PREVIOUS DURATION OF THE CASE.

1. First attack, and under 3 months' previous duration, 40·00 per cent.
2. First attack, above 3 months, but under 1 year's do., 13·68 , ,
3. Not first attack, under 1 year's previous duration, 12·63 , ,
4. Cases above 1 year's previous duration, - 28·42 , ,
5. Cases of unrecorded previous duration, - 5·27 , ,

TABLE XIV.
CASES DISCHARGED CURED.

No.	Sex.	Age.	Form of Insanity.	Duration of Disease previous to Admission.	Mental Cause.	Physical Cause.	Duration of Residence.
1	M.	21	Mania, (moral),	-	1 month,	-	-
2	M.	27	Mania,	Doubtful,	-	Hereditary tendency,	9 months.
3	M.	25	Mania,	3 days,	-	Intemp. and prev. attack,	7½ years.
4	M.	40	Mania,	7 days,	-	Intemp. and Epilepsy,	8 months.
5	M.	31	Mania,	Unknown,	-	Epilepsy and prev. attack,	2 months.
6	M.	60	Mania,	10 days,	A quarrel,	-	2 months.
7	M.	35	Mania,	2 weeks,	Destitution,	-	3 months.
8	M.	35	Mania,	6 weeks,	-	Intemperance,	2 months.
9	M.	54	Mania,	1 month,	-	Previous attacks,	7 months.
10	M.	31	Mania,	10 days,	-	Intemperance,	2 months.
11	F.	50	Mania (epileptic)	1 month,	-	Hereditary tendency,	5 months.
12	F.	26	Mania,	1 week,	-	Change of life,	1 year and 8 months.
13	F.	50	Mania,	3 months,	-	Intemperance,	3 months.
14	F.	18	Mania,	2 weeks,	Seduction and desertion,	Fever and hered. tendency,	2 months.
